32	Auto Discovery Server									X
33	Blu-ray Disc Dual Layer									X

Enhanced Functionality

Improved Ergonomics

Increased Performance / New Technology

Rimage Software Enhancements

Major Enhance- / Improvement

No.	Title	Description
1	QuickDisc Wizard Based	Guided, step-by-step workflow in QuickDisc for job creation, submission and monitoring
2	BTW Lable Preview in QD	Real-time, WYSIWYG label preview of layout and merged text data before job submission
3	DVD Dual Layer	Support of dual layer technology to increase data volume on a single DVD to 9.x GB.
4	UDF Support Enhanced	Enhanced Universal Disk Format support - i.e. file names up to 126 characters incl. '%' and '@'
5	Quickdisc Filters	Enhanced filtering based on file extension for including / excluding files in folders
6	Ribbon + Media Tracking	Provide information about ribbon and media consumption to any client
7	Disc Watch	Support for status lamp (Factory Beacon) on top of Producer Systems
8	Overlap Recording	Increased speed of disc production - Production Server starts recording before caching is complete
9	DVD-R Multisession	Support for incremental multi-session on DVD-R.
10	Unicode Imager	Support of Unicode character set (>100,000 characters) for internationalization and localization
11	Verify Only Mode	Verification of burned discs through algorithms for verifying the integrity or authenticity of a file
12	Burn Speed Visualized	Drive speed info for each recorder reported including support for SDK through XML message
13	Image Streaming	Data streamed directly to recorder without caching to improve rec. speed and first-disc-out
14	WAV-File Support	Support for WAV-image files in QuickDisc
15	DVD Video Projects	Enhanced Power Image to support DVD video projects
16	Disc Spanning	Span discs automatically if content exceeds disc capacity, manage read back automatically
17	Alerts With Action Ids	Add action ID to dialog events for errors + alerts - clients can take autoimatic action based on ID
18	UDF 2.X	Support for newer UDF image types in UDF 2.0, 2.01, 2.5, and 2.6.
19	Modify Disc.DLL Status	Improved status messages from ModifyDisc.DLL - perform special recording or reading actions
20	Blu-ray Disc Support	Support of Blu-ray technology
21	Bulk Read Filter	Discs can be read back in bulk and filter data automatically
22	CD Designer 7.75	Updated version of CD Designer
23	Rimage Video Protect	Option to protect Video DVDs - increases security to prevent unauthorised copying
24	Bulk Read - Add. Features	Select print reject labels on failed discs during bulk read mode, to identify disc not read
25	Reject Labels W. Order ID	Ability to include OrderID in printed labels for rejected discs for faster identification of failed jobs
26	Perftrack DB Error Codes	Error codes stored in ErrorLog table of Perftrack database for easier remote support
27	New Messaging Architect.	Complete new messaging server to improve performance and reliability
28	Disc Order Sets	Software packs that comprise of 2 or more discs are manufactured as a set
29	DiscFlow - MAC Client	Macintosh client including new Watch Folder concept for automatic disc production
30	PDF-Labels Merge Files	Merge files with PDF-labels - function can be used from QD without installing CD Designer
31	Web RSM	Browser based Rimage System Manager to configure and manage system from any web client
32	Auto Discovery Server	Every new system hooked up to the network will introduce itself dynamically to all clients
33	Blu-ray Disc Fual Layer	Support of Blu-ray Dual Layer technology to extend capacity of a single disc to 50 GB
	Enhanced Functionality	
	Improved Ergonomics	
	Increased Performance / NT
